| <b>Beschreibung / Besonderheiten</b><br>Zwergstrauch-Heide im Revier Poitendorf Abt. 302 auf Kiefern-Birken-Sukzessionsfläche (auf den freien Zwischenräumen). Der Standort ist durch eine gestörte Sand-Braunerde (ehem. militärische Nutzung) gekennzeichnet. Der Biotop besteht aus Heidekraut-Heide mit deckend Heidekraut und Drahtschmiele. Zahlreich tritt Rotstengeliges Astmoos auf. Vereinzelt kommen Flechtenarten, Haar-Hainsimse, Pillensegge und Haar-Ginster (RLA-3) sowie Kiefern- und Birken-Sämlinge vor.<br>Ohne Eingriffe würde sich die Fläche relativ schnell (4 - 5 Jahre) mit Kiefer und Birke bestocken.                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                       |                                     |                                                                                                                 |                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                          |                                                                                                                                             |  |   |         |  |  |                                 |                                                                                                                                             |                                    |  |  |  |  |                                                                                                                                             |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                    |  |   |   |   |   |   |   |   |                                                                                                                                                     |  |   |   |   |   |
