| <b>Beschreibung / Besonderheiten</b><br>Teilweise vermoorte Senke im welligen Sander. Dominierende Vegetationsformen: Erlen-Bruchwälder feuchter bis nasser eutropher und monotoner Nachschatten-Schilf-Röhricht nasser eutropher Standorte überwiegend auf Torf zur Seeseite hin auf Schlamm am Rande des Biotopes auf Sand. Das Biotop liegt in der offenen Agrarlandschaft ringförmig um einen kleinen Flachsee. Zonierung der Vegetationsformen: großflächiger Schilf-Wasserröhricht darauf folgendes Schilf-Grau-Weiden-Gebüsch als Übergang zu Wald und anschließender Erlen-Bruchwald. Kleinflächig eingesprengte Mosaik von Röhrichten der Teich-Simse und des Ästigen Igelkolbens, am Waldrand Sumpf-Seggen-Rieder. Mehrere alte Erlen vorwiegend in den nördlichen und westlichen Bereichen. Ausprägung des Biotopes im Süden und Westen als Verlandungsmoor.<br>Gefährdungen: Entwässerung des stark sandigen Umlandes; wilde Müllablagerung. |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |  |
