| <b>Beschreibung / Besonderheiten</b><br>Das Feuchtgebiet befindet sich auf ebener Fläche im Randbereich einer Niedermoorsenke. Feuchte bis sehr feuchte Antorfe und Lehme bestimmen das Substrat. Östlich grenzt ein Schilf-Röhricht-Gürtel an das Gebiet, dem ein Bruchwald folgt. Im Westen wird das Biotop von Acker und Grünland umgeben. Südlich des Biotopes befindet sich ein Ufergehölzsaum. Im Biotop dominieren Feuchthochstaudenfluren, bei denen Mädesüß, Sumpfschilf und Gräser wie Wiesenfuchsschwanz und Rasenschmiele eine prägende Rolle spielen. Bisweilen gelangt jedoch auch die Sumpfschilf zur absoluten Dominanz und bildet Riede. |   |                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                 |   |                                                                                                                                                                                                                                                                       |  |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
