| <b>Beschreibung / Besonderheiten</b><br>Im Norden einer stark entwässerten Senke hat sich nach Auflassung der Wiesennutzung auf dem eutrophen feuchten und wasserzügigen Antorf auf ca. 200 m² eine Staudenflur entwickelt. Es dominiert eine schilffreie Zweizeilenseggen-Staudenflur mit zahlreicher Kohlratzdistel. Im südlichen Biotopbereich befindet sich eine rasenschmielenreiche Wassernabel-Sumpfschilf-Staudenflur mit Flatterbinse, Gänsefingerkraut, Uferwolfstrapp ect. Der Biotop wird von frischer Ruderalflur umgeben.                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |                  |   |                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |  |                                                                                                                                    |  |                          |                                                                                                                                                |  |                                                                                                                                                                                                                                                                                                                                                                                                  |  |   |                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                        |                                                                                                                                              |  |   |                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |                                                                                                                                        |   |  |  |  |  |  |  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
