| <b>Beschreibung / Besonderheiten</b><br>Sand-Magerrasen auf einem kartenübergreifenden 300m langen Saum zwischen einer Ackerbrache ( Gemarkung Alt Schwerin) und dem Rand eines großen Kiefernforstes (Gemarkung Nossentiner Hütte, Ortsteil Sparow). Das Biotop präsentiert sich großflächig als Rotstraußgras-Flur. Diese enthält u. a. Habichts-, Ruhr- und Ackerfilzkraut (RLA-2), Jährigen und Ausdauernden Knäuel, Schafschwingel und Berg-Sandknöpfchen, Wilde Seradella und Sand-Strohblume, aber keine Grasnelke.<br>Zum Biotop gehört auch der vor dem Kiefernforst angelegte ehemalige Brandschutzstreifen, auf dem ebenfalls Magerrasen-Flora aufgewachsen ist.<br>Eigenartigerweise hat sich nach der Rotstraußgras-Flur - außerhalb des Biotops - auf der Ackerbrache eine streifenweise verbuschte Drahtschmielen-Flur angesiedelt.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
