|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                   |           |                                                                                                    |                                                                                                    |                                    |                                                                                                   |                                                                                                                                         |           |                                                                                                    |                                                                                                                                                      |  |                                                                                                    |                                                                                                                                       |                  |                                                                                                                                                   |   |                                  |                                                                                                   |                                                                                                                                             |                   |                                                                                                         |           |                                        |           |                                                                                                                                             |  |                                                                                                                                                                                                                                                                                                                                                                    |  |                      |                  |                                               |   |                              |   |                                               |                                                                                                                                                     |                                |       |                                    |       |                                        |  |                               |  |  |  |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>- Kurzbezeichnung:<br>Es handelt sich um einen Sandmagerrasen, der sich am Rand des aufgelassenen Kinderferienlagers befindet.<br>- Kennzeichnung des Standortes:<br>Der überwiegend mesotrophe Standort ist mäßig trocken, das Substrat großflächig Hochflächensande des Weichselglazials. Im Biotop liegen zwei kleine Kuppen, von der die nördlich gelegene teilweise abgetragen wurde (Sandgewinnung).<br>- Landschaftliche Einbindung:<br>Das Biotop liegt im LSG Plauer See rund 200 Meter vom Seeufer entfernt auf einer leicht erhöhten Sandterrasse. Zwischen See und Biotop befindet sich eine Frischwiese (östlich).<br>- Vegetationseinheiten:<br>Der größte Teil der Fläche wird von einer Rotstraußgrasflur eingenommen. Er findet sich vor allem im Teil nördlich des Weges. Die Flur ist stark vermoost. Der Jasionen-Schafschwingel-Sandmagerrasen findet sich südlich des Weges und zwischen den ersten aufgelassenen Bungalows der Siedlung. Kennzeichnende Arten sind die Berg-Jasione, der Schafschwingel, der Furchenschwingel und die Grasnelke. Der Hügel nördlich des Weges ist teilweise abgegraben worden. Hier hat sich kleinflächig eine Silbergrasflur etabliert. Neben dem Silbergras findet sich hier der Feld-Beifuß und der Feld-Klee.<br>- Besonderheiten:<br>Die Fläche wird durch einen unbefestigten Weg geteilt. Ein kleiner Teil der Fläche liegt auch zwischen den ersten Ferienbungalows des Lagers. Der Schutz dieses Teiles ist nur sinnvoll, wenn die Nutzung des Ferienlagers ganz aufgegeben wird. |                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                   |           |                                                                                                    |                                                                                                    |                                    |                                                                                                   |                                                                                                                                         |           |                                                                                                    |                                                                                                                                                      |  |                                                                                                    |                                                                                                                                       |                  |                                                                                                                                                   |   |                                  |                                                                                                   |                                                                                                                                             |                   |                                                                                                         |           |                                        |           |                                                                                                                                             |  |                                                                                                                                                                                                                                                                                                                                                                    |  |                      |                  |                                               |   |                              |   |                                               |                                                                                                                                                     |                                |       |                                    |       |                                        |  |                               |  |  |  |  |  |  |  |  |  |
