|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |                                               |                  |                                         |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                        |   |  |                                                                                                                                                  |  |   |   |                                                                                                                                                         |  |   |   |   |   |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
| <b>Beschreibung / Besonderheiten</b><br>300m südöstlich des Rundlings (Klein Plasten) befindet sich eine grünlandgenutzte Senke, in deren östlicher Ecke sich eine kleine Kohldistel-Feuchtweide ausgebildet hat.<br>Der Standort ist sehr feuchter bis nasser degradierter Torf, der leicht geneigt ist und von Nord nach Süd von Grundwasser durchströmt wird. Im Süden grenzt das Biotop an den Entwässerungsgraben.<br>Zahlreiche Arten der Kohldistelwiese prägen die mäßig eutrophen Wiesenbereiche, wie z.B. Sumpfschilf, Hirsesegge, Gliederbinse oder Scharfer Hahnenfuß.<br>Die Fläche ist extensiv mit Rindern beweidet. Die restlichen umgebenden Weideflächen sind artenarme, weniger nasse Feuchtweidenbestände.<br>Das häufige Auftreten der Hirsesegge im Biotop ist als Besonderheit anzumerken.                                                                                                                                                                          |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |                                               |                  |                                         |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                        |   |  |                                                                                                                                                  |  |   |   |                                                                                                                                                         |  |   |   |   |   |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
