| Beschreibung / Besonderheiten Rotstraußgrasflur mit typischer Artenzusammensetzung auf mäßig trockenem Sandstandort auf einer Waldlichtung südöstlich von Speck, offensichtlich in extensiver Wiesenutzung. Im Norden führt ein Wanderweg vorbei. Im Süden schließt sich der Bruchwaldgürtel des Priesterbäcker Sees an. Hier gibt es am Waldrand mehrere eindrucksvolle mehrhundertjährige, beschattete Eichen, die teilweise zusammenbrechen. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
