|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |           |           |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                      |  |                   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |           |                                                                                                                        |  |   |  |   |   |   |   |                   |      |           |           |           |           |  |  |  |  |  |  |  |   |       |       |  |   |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>Auf einer Sandlinse am Rande des Feuchtgrünlandes hat sich ein Sandmagerrasen unterschiedlicher Ausprägung entwickelt. Er grenzt an ein größeres Kieferngelände. Kleinere Gehölze mit ausladenden Kiefern finden sich innerhalb des Magerrasens und beschatten die Fläche zunehmend.<br>Randlich wird die Fläche im Zug der Grünlandbewirtschaftung gemäht.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |           |           |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                      |  |                   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |           |                                                                                                                        |  |   |  |   |   |   |   |                   |      |           |           |           |           |  |  |  |  |  |  |  |   |       |       |  |   |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
