|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                 |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                            |   |   |   |   |  |                          |   |   |  |  |  |  |  |                                                                                                                                                                                               |  |  |  |                                                                                                                                                                                                                                                 |                                                           |                                                                   |                                                                                                                                                                                                                  |                                                                 |                                           |                                                                    |                                               |                                                                        |                                                       |                                                                        |                                                         |                                                                                                                                                                                                                  |                                                                 |                                                        |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                        |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>Uferseggenried im Uferbereich eines Flachsees auf sehr feuchtem Torfstandort. Auf feuchten Torfstandorten Ruderalisierung durch Brennessel und Übergang in artenarme sumpfseggenreiche Brennessel-Hochstaudenflur. Vergesellschaftung Ackerkratzdistel, Klebkraut und Landreitgras. An den Biotoprändern landseits Verzahnung mit nicht geschützter Brennesselflur, in der Sumpfsegge nur noch sehr vereinzelt vorkommt.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                 |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                            |   |   |   |   |  |                          |   |   |  |  |  |  |  |                                                                                                                                                                                               |  |  |  |                                                                                                                                                                                                                                                 |                                                           |                                                                   |                                                                                                                                                                                                                  |                                                                 |                                           |                                                                    |                                               |                                                                        |                                                       |                                                                        |                                                         |                                                                                                                                                                                                                  |                                                                 |                                                        |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                        |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |
