| <b>Beschreibung / Besonderheiten</b><br>Ca. 1km südöstlich Carpin entwickelte sich auf stark degradierten Torfen ein kleiner Birken-Erlenbruch mit Pfeifengras, Strauß-Gilbweiderich, Sumpf-Haarstrang, Walzen-Segge und Sumpf-Wasserstern. Umgeben wird der Biotop von einem stark entwässerten Brombeer-Erlen-Birkenwald und einem Frauenfarn-Erlenwald, welche sich stellenweise mit dem feuchten Erlenbruch vermischen. Nach außen schließen sich Kiefernforsten an.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |       |                                                                                                                                                                                                                                                                                               |       |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                        |                   |            |             |       |       |         |   |  |  |  |  |   |  |   |  |   |   |   |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |

Pflanzenarten dominant

Alnus glutinosa

( unterstrichen: Art der Roten Liste MV, fett: Art der BArtSchV, kursiv: Art des Florenschutzkonzpts )

Betula pubescens

Pflanzenarten ±zahlreich

Callitriche palustris

Athyrium filix-femina

( unterstrichen: Art der Roten Liste MV, fett: Art der BArtSchV, kursiv: Art des Florenschutzkonzpts )

Lysimachia thyrsiflora

Oxalis acetosella

Molinia caerulea

Rubus fruticosus agg.

Carex elongata

Impatiens parviflora

Pflanzenarten vereinzelt

Myosoton aquaticum

Quercus robur

Juncus effusus

Stachys palustris

Deschampsia cespitosa

( unterstrichen: Art der Roten Liste MV, fett: Art der BArtSchV, kursiv: Art des Florenschutzkonzpts )

Calamagrostis canescens

Sorbus aucuparia

Glyceria fluitans

Geum rivale

Lysimachia vulgaris

Picea abies

Urtica dioica

Carex canescens

Glechoma hederacea

Peucedanum palustre

Poa trivialis

Dryopteris dilatata

Ranunculus repens

Miliun effusum
