| <b>Beschreibung / Besonderheiten</b><br>Dieses Seggenried befindet sich südwestlich von Jatzke am Rande des Jatzker Waldes inmitten einer ruderalen Staudenflur. Im Norden und Süden tritt ein Schnabelseggenried auf, in der Mitte des Biotops ein Uferseggenried. Vereinzelt kommen auch Steifsegge und Schlanksegge vor. Ansonsten treten in dem Seggenried auch Blutweiderich, Wassermünze, Helmkraut, Nachtschatten, Sumpf-Schwertlilie und Sumpf-Reitgras auf.<br>Die Trophie des Seggenriedes ist eutroph, die Feuchtestufe sehr feucht und das Substrat ist Torf. Das Biotop ist nicht genutzt und nicht gefährdet. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |                                                                                                                                 |                                                                                              |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |   |   |   |   |   |  |  |  |   |  |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |   |   |   |   |   |   |   |   |   |   |   |
