|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |                                                      |                  |                                       |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                         |  |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                          |  |  |  |  |                                                                                                                                                            |  |   |   |                                                                                                                        |                                                                                                                                                         |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
| <b>Beschreibung / Besonderheiten</b><br>Am Rand einer vermoorten Niederung wächst auf antorförmigem, feuchtem und ehemals quelligem Flachhangstandort das Fragment einer Feuchtwiese. Wasserröhricht, Flatterbinse, Sumpfschilf und Kohldistel sind die prägenden Arten. An einer Stelle tritt Waldsimse auf. Teilweise finden sich nicht geschützte Flatterbinsen-Dominanzbestände. Vereinzelt kommen Kuckuckslichtnelke und Schlangenkriecher vor.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |                                                      |                  |                                       |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                         |  |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                          |  |  |  |  |                                                                                                                                                            |  |   |   |                                                                                                                        |                                                                                                                                                         |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
