| <b>Beschreibung / Besonderheiten</b><br>In einer kleinflächigen und vom angrenzenden Niedermoorkomplex durch Mineralboden abgegrenzten vermoorten Senke hat sich ein vom Wasserschwaden dominiertes Röhricht entwickelt, das von einem Graben entwässert wird. Die Umgebung wird durch intensiv genutzte Mähweiden geprägt. Am südlichen Rand wachsen Lorbeerweiden.                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                       |   |                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                          |                                           |  |                                                                                                                          |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |   |   |                                                                                                                        |   |   |   |   |   |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                              |  |   |   |   |   |   |   |   |                                                                                                                          |  |   |   |   |   |
