| <b>Beschreibung / Besonderheiten</b><br>Auf einer trockenen, sandigen Ackerbrache am großen Waldgebiet zwischen Gellin und Grambow gibt es eine Stelle mit artenarmen, oligo- bis mesotrophen Magerrasen. Ca. 80 % der Fläche können als Sandmagerrasen angesprochen werden. Hier dominieren dichte Bestände der Sandstrohlblume (Sauerampfer-Sandstrohlblumenrasen). Auffallend ist der Moos- und Flechtenreichtum. Eingestreut sind sehr oligotrophe Bereiche mit Pionier-Sandflur (Sandstrohlblumen-Silbergrasflur), welche aber nur eine geringe Fläche einnehmen. Die restlichen 15 % werden als ruderalisierter Sandmagerrasen beschrieben (Schafgarben-Schwingelrasen und Sandstrohlblumen-Schwingelrasen). Sehr vereinzelt tritt Kiefernflug auf. Die Fläche ist aufgelassen. Empfohlen wird die Pflegenutzung über eine extensive Beweidung.                                                                                                                                                                                                                                                                                                                                                                                         |                                                                  |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |                                                                                                                                            |   |   |                                                                                                                           |                              |  |                          |   |                                                                                                     |   |                                                                                                                                    |   |   |   |   |   |   |   |                                                |                                                           |                                                                                                                                    |                                                     |                                                                 |                                           |                                                                    |                                               |                                                                        |                                                                  |                                                                        |                                                         |                                                             |                                                                 |                                                        |  |  |  |                                                                                                                                                                                                                  |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                       |  |  |  |
