| <b>Beschreibung / Besonderheiten</b><br><p>Noch feuchter Teil eines stark entwässerten Sumpfschilf-Schwarzerlenbruches. Die alten Erlen weisen schon Stelzwurzeln auf. Die Krautschicht wird in diesem Teil von der Sumpfschilf bestimmt, während der Rest des Waldes die Brennessel dominiert. Die Erlen sind teilweise mehrstämmig (d 40 cm). Das Substrat wird aus humosem bis antorfem Talsand bzw. degradierten Torfen gebildet. Infolge großflächiger Entwässerung sind alle ehemaligen Feuchtwaldstandorte stark geschädigt.</p>                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |                  |                                            |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                      |                                                                                                                                                    |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
