| Beschreibung / Besonderheiten Von Nord nach Süd geschwungen - geschlängelt abfließender naturnaher Abschnitt eines Bachlaufes innerhalb der Endmoräne, dessen Bachbett Sand und Geröll bestimmen. Der Bach verläuft innerhalb eines Feldgehölzes und seine Ufer begleiten lückige ein- bis mehrzeilige Gehölzsäume aus Erle. Im Mittelteil speist am Westufer eine Sickerquelle den Bachlauf. Im Süden fließt ein ebenfalls geröllreicher Bach, der aus östlicher Richtung kommt, in den beschriebenen Bachlauf. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
