| <b>Beschreibung / Besonderheiten</b><br>Eutropher Erlenbruchwald im westl. Verlandungsbereich des Demminer Sees,<br>Auf feuchtem und sehr feuchtem Moorboden hat sich ein struktureicher Bruchwald mit ausgeprägter Kraut- und Strauchschicht entwickelt, dessen Baumschicht zum größten Teil aus Schwarzerlen und Moorbirken besteht. Auffällig ist der Jungaufwuchs von Gem. Esche und Bergahorn. Dorn- und Breitblättriger Wurmfar und im sehr feuchten Bereich Sumpffarn und Sumpfsegge dominieren in der Krautschicht. Seeseitig stehen saumartig Grauweidengebüsche in lockeren Abständen.<br>Einige auf Stock gesetzte Erlen zeugen von der ursprünglichen Nutzung als Niederwald. |                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |                                               |   |                                   |   |   |   |                       |   |                                          |   |                                        |                                                                                                                                                                                                                                                                                                                                     |                                           |   |                                               |                                                                                                                                                                                                                                                                                                                                               |                                               |   |                                    |   |                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |   |   |   |                                                      |                                  |   |                            |   |                  |                                                                                                                                                                   |                      |   |                              |   |                                |  |                                        |  |  |  |  |  |  |  |  |  |  |  |  |
