| <b>Beschreibung / Besonderheiten</b><br>Das Moor liegt in einer flach vermoorten Senke im Wald 900 m S vom Parkplatz "Heilige Hallen" bei Lüttenhagen, unmittelbar östlich des Weges. Sie ist nach O bzw. SO gestreckt und besitzt einige Engstellen und Ausbuchtungen. Infolge einer Wasserstandsanhebung sind größere Bereiche , u.a. im W und N flach überstaut, hier sind auf eutrophen Standorten Bestände der Arten Kleine Wasserlinse, Wasserfeder, Wasserlebermoos, Flutschwaden und Schwertlilie zu finden. Wenige Gehölze und Totholz weisen auf frühere Bewaldung hin. Im SO-Teil der Senke herrschen sehr feuchte bis nasse, z.T. mesotrophe Bedingungen, der Untergrund ist hier z.T. lehmig. Es sind Staudenfluren mit Arten wie Große Brennnessel, Sumpfreitgras, Hexenkraut oder Milzkraut, kleine Grauweidengebüsche mit Schwertlilie, Sumpfcalla oder Sumpflappenfarn oder Flutrasengesellschaften sowie ein Degradationsstadium der Sauer-Zwischenmoore mit Torfmoosen und Sumpfreitgras ausgebildet. Hundsstraußgras, Schnabelsegge und Sumpfbultauge gehören zum Arteninventar.<br><br>Das Biotop ist dem FFH-Lebensraumtyp LRT 7140 zuzuordnen. Der Erhaltungszustand wird mit B (gut) eingeschätzt. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
