| <b>Beschreibung / Besonderheiten</b><br>Ca. 0,8 km nordwestlich von Neuhoof befindet sich nördlich an den Höhenrücken der Pommerschen Hauptendmoräne angrenzend ein Senkenkomplex in einer größeren Grünlandfläche. Die Senken sind teilweise vermoort und wurden durch entwässert. Nachdem das Entwässerungssystem ausgefallen war, wurden die Senken nach 1962 und vor 1991 überstaut.<br><br>Das trifft auch für die hier beschriebene Senke zu. Zum Zeitpunkt der Kartierung war sie weitgehend wassergefüllt.<br><br>Die Wasserfläche war recht vegetationsarm. Es wurden nur wenige Exemplare von Ceratophyllum demersum, Potamogeton natans, Ranunculus circinatus und Polygonum amphibium gefunden. Sie ergaben zusammen etwa 5 % Vegetationsbedeckung.<br><br>Entlang der Ufer hatten sich schmale Säume mit Kleinröhricht des Einfachen Igelkolbens und der Sumpf-Simse gebildet. |   |                                                                                                                                                                                                                                                                                                                                                                                                                              |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |                                           |   |   |                                                                                                |   |   |   |   |   |  |  |  |   |  |  |  |                                                                             |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                              |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                   |  |
