| <b>Beschreibung / Besonderheiten</b><br>An das nach Norden gerichtete Südostufer des Schmalen Luzins schließt sich eine schmale Verlandungszone mit einem zentralen Graben an. Sie wurde bis vor ca. 20 bis 25 Jahren noch als Feuchtwiese genutzt. Nach der Auflassung wandelte sich die Feuchtwiese in eine Brennessel-Staudenflur mit Schilf um. Nur im westlichen seenahen Teil bildete sich ein Seggen-Erlen-Bruchwald.<br><br>Die Erlen sind nicht besonders wüchsig. Der Kronenschluß der Baumschicht erreicht 75 bis 85 %. Eine Strauchschicht ist kaum vorhanden.<br><br>Aspektbildende Art in der Bodenvegetation ist die Sumpf-Segge. Es kommen aber auch schon Arten trockenerer Ausbildungsformen (Himbeer- bzw. Rasenschmielen-Erlen-Bruchwald) vor.                                                                                                                                                          |                                                                                                                                                                                                                        |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |                                                      |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |                                                                                                                                                                                                                                                                                      |   |                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                        |   |   |                                                                                                                                                                                                                 |   |  |   |  |  |  |                                                                                                                                                                                                                                                                                                                                                                |  |                  |                                                                                       |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                            |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                                      |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                                            |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |
